\$6000+

Average Cost: \$6900

What does this mean?

When purchasing your new spa and spa cover we understand there is a lot to consider. It is important to consider all of the costs; although covers are generally inexpensive the cost of replacement covers and privacy gazebos can quickly add up. With the Covana you skip the hassle and payments of buying replacement covers and gazebos and you have the luxury of having a durable, long lasting automatic spa cover and privacy gazebo all with one smooth and quick installation.

For less than the cost of a cup of coffee a day you can own the Covana! Imagine paying only \$34/month and having the luxury of just turning a key in the cold of winter to lift open your spa cover and gazebo. Save yourself money in the long run by making a smart decision now!

It is a fact that standard hot tub covers need to be replaced every 3-4 years as they become water logged and impossible to lift. It is also a fact that hot tub covers get thrown in the landfill where they rot and pollute our environment for years. The Covana will likely outlast the life of your spa. It will also allow you to enjoy your spa with the most convenient, luxurious, green and energy efficient hot tub cover you can find, with the added comfort and privacy the elegant gazebo adds.

The Covana also eliminates the fear of children or unwanted intruders gaining access to your spa while you are away. Simply removing the key from the key switch will lock the Covana in its position. Removing the key after fully lowering the Covana will provide a secure lock and give you piece of mind when leaving your spa unattended as it is impossible to lift the Covana once it is locked.
